3rd European Conference on Pharmaceutics

Bringing science into pharmaceutical practice

25 to 26 March 2019, Bologna, Italy

Dear Colleague,

Following the great success of the last two European Conferences, which were held in Reims and Krakow, it is our great pleasure to announce the third congress of this new series of international meetings, which will be held in Bologna, Italy, on 25 to 26 March 2019. It will be dedicated to „Bringing science into pharmaceutical practice“.

The European Conferences on Pharmaceutics are held every two years (in March/April of the uneven years). They are jointly organized by the A.D.R.I.T.E.L.F. ("Italian Association of Pharmaceutical Technology and Law"), APGI ("International Society of Drug Delivery Sciences and Technology") and APV ("International Association for Pharmaceutical Technology").

The aim is to help bridging the gap between fundamental academic research and industrial applications, offering the opportunity to initiate fruitful exchange and cooperation between university and industry. The conference will be a perfect occasion for young as well as for established scientists from academia and industry from all over the world to present their work, network, discuss newest scientific findings and to share their experience with colleagues.

Hot topic sessions

- Manufacturing equipment and technologies
- Nanomedicines
- Arising new manufacturing technologies
- Advances in oral drug delivery

World-wide leading experts in the field will give plenary lectures and invited talks on hot topics. They will give overviews on the current state of the art in the respective domains and outlooks on future perspectives. In addition, latest research findings will be presented in the form of short talks, selected from submitted abstracts. Furthermore, poster presentations will give the opportunity to get an update on the most recent research in pharmaceutics and to personally exchange with the authors.

An industrial exhibition will accompany the conference and allow learning about the latest trends and newest products in the area of pharmaceutical ingredients, developing & processing equipment, analytical technologies, medicinal products, medical devices, contract manufacturing and many other fields.

All coffee and lunch breaks as well as the welcome reception will be included in the registration fees and be held in the industrial exhibition and poster presentation area in order to facilitate discussions between participants, exhibitors and presenters.

We are looking forward to seeing you at the 3rd European Conference on Pharmaceutics in Bologna in 2019.
