

CHARACTERISTICS & FUNCTIONALITIES

LACTOSE MONOHYDRATE

201

DESCRIPTION

ARMOR PHARMA™ lactose monohydrate 201 is a fine milled powder of α -lactose monohydrate. This lactose is produced in ARMOR PHARMA™ dedicated & state-of-the-art facility in Loudéac (France). Manufactured under EXCIPACT™ GMP standards, it conforms to Ph.Eur, USP-NF and JP lactose monohydrate monographs.

SEM (Scanning Electron Microscopy)

KEY BENEFITS

- Compaction properties
- Blending properties
- Storage stability

APPLICATIONS

- Wet granulation
- Dry granulation
- Blends/Premixes/Triturations
- Fermentation processes

PARTICLE SIZE DISTRIBUTION (PSD)

PSD (Air jet sieve)	Specifications (%)
% < 32 μm	45 - 75
% < 100 μm	≥ 90

Due to the presence of fine milled particles, this α -lactose monohydrate combines good compaction and blending properties.

PSD (Malvern Laser diffraction, indicative values)

MOISTURE SORPTION

DVS (Dynamic Vapor Sorption)

The hygroscopicity of α -lactose monohydrate is very low which enables high stability both in storage as well as in formulations

FLOWABILITY

- POURED DENSITY: 0.53 g/mL
- TAPPED DENSITY: 0.80 g/mL
- CARR'S INDEX: 34 %
- HAUSNER RATIO: 1.52

How would you **like** your lactose?
